www.safteypassiton.com

Objective

To provide a high standard of medical care, provide experience-based military expertise, and be a positive influence on my fellow crew members during the entire production, using observation, consultation, and a proactive approach to prevent injury and fatigue to the degree possible, reacting quickly when medical needs arise, and following up appropriately to help ensure recovery in the shortest time possible.

Experience

Being a Set Medic is not just a job but a commitment. Having worked many years to create a high standard of care, I am highly regarded in the industry for my due diligence and diligence on set, which includes following HIPAA laws, staying within my scope of care, and completing necessary paperwork.

Being a Health and Safety Manger is an extremely rewarding job. I enjoyed the challenging work and the long hours. I did the training and cultivated multiple protocols that Disney Corp put into place. It showed with a .187% positivity rate while L A was at 25%.
